A remote farmhouse in Cornwall seems the perfect place for Ash to settle into his recently altered status. Starting a new life there with Sam-the shifter he can't stay away from-should be easy this far from London where they faced so much danger. So why does adjusting seem impossible? Sam has issues of his own. He has to get used to his human form again after living the last eight years as a wolf. It's hard when human worries weigh so heavily on his shoulders. Life is much more straightforward from a wolf's perspective, until Ash needs his human support. Ash's problem is simple: he's fearful of shifting fully. How can he believe he won't hurt Sam when his genes were altered to create a killer? Despite repeated reassurance, his anger and resentment increase. Only one thing is certain: if Ash can't learn to trust himself soon, he's in danger of proving himself right.
