paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 258 Publisher: Defense Industry Pub. Date :2011-05-01 version 1. Communication theory simulation. design and training (the author on behalf of Yonghong, Zheng Jiansheng, Liu Yanfei) is divided into 11 chapters. Chapter 1. Chapter 2. Chapter 3 introduced the basic concepts of communication systems and simulation software SystemView and use the basic situation. but also describes the hardware implementation of communication systems and the corresponding EDA tools. Chapter 4 describes the digital source. the source is required in a communication system. the contents of communications systems at all levels are a variety of sources to complete the corresponding operation. through a clear communication to help students learn the principles of data generated and its follow the basic rules. Chapter 5 describes the encoding and decoding digital signals. to help students understand communication with a data transmission over Cheng Zhongji procedures. Chapter 6 describes the digital baseband communications. to help students understand the basic concepts of data communications. the establishment of emotional understanding of the communication system. Chapter 7 describes the digital modulation. discussed a variety of digital modulation methods and their implementation. Help students develop the concept of communication systems-band communication. understanding. communication system and communication system bandwidth transport mechanism the composition of the emission units and principles. Chapter 8 describes the digital demodulation. demodulation is given for different modulation schemes to achieve. Communication to help students understand the function of receiving units must be completed and the design and implementation of each functional unit. Chapter 9 introduces carrier synchronization. synchronization is a very important element of communication systems. communication systems can work simultaneously with the sending and receiving system is closely related to synchronous data communication must be...
