

Macrophages and Natural Killer Cells

Filesize: 4.45 MB

Reviews

I actually started out reading this book. It can be packed with wisdom and knowledge I discovered this ebook from my dad and i suggested this book to understand.

(Prof. Barney Harris)

MACROPHAGES AND NATURAL KILLER CELLS

[DOWNLOAD](#)

Book Condition: New. Publisher/Verlag: Springer, Berlin | Regulation and Function | This book is the outcome of a meeting held in Davos, Switzerland, February 7-12, 1982 focused primarily on mononuclear phagocytes and on natural killer (NK) cells. This IX International RES Congress was attended by 489 scientists from 31 countries and there were 340 scientific presentations in oral or poster session. The essential purpose of the Congress was to bring together scientists representing various aspects of mononuclear phagocyte biology to review and examine critically the effects and mechanisms of macrophage growth control as well as the participation of these cells in the afferent and efferent limbs of the immune response. Additional topics included the production and distribution of mononuclear phagocytes; the intrinsic and extrinsic regulation of these cells; and the origin, nature, function and regulation of NK cells. The ultimate goal of the Congress was to enhance communication between scientists in various countries and disciplines so that new research directives could be defined with which to explore basic aspects of macrophage and NK cell participation in the control of cancer and infection. | Opening Address.- The Impact of Immunology on Medicine.- Major Addresses.- Membrane Receptors and the Regulation of Mononuclear Phagocyte Effector Functions.- Regulation of Macrophage Production.- Symbiotic Relationships between Macrophages and Lymphocytes.- Macrophages and Cancer Metastasis.- Immunological Surveillance versus Immunological Stimulation of Oncogenesis- a Formal Proof of the Stimulation Hypothesis.- Chemotaxis and Phagocytosis.- Physical and Chemical Determinants of Leukocyte Locomotion.- Functionally Distinct Subpopulations of Human Monocytes: Receptors for F-Met-Leu-Phe are Expressed only on the Chemotactically Responsive Cells.- Modulation of Granulocyte Response to the Chemoattractant F-Met-Leu-Phe.- Cytoskeleton-Membrane Interaction and the Remodeling of the Cell Surface during Phagocytosis and Chemotaxis.- Enhancement of Phagocytosis by Neurotensin, a Newly Found Biological Activity of the Neuropeptide.- A Membrane Lectin on Macrophages: Localization and...
