Createspace Independent Publishing Platform, United States, 2014. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.What is the function of the non-coding junk part that comprises 98 of our DNA? It s all junk right? junk junk junk and more junk on top of the junk.at least according to the scientists ? Yeah WRONG! The 98 that is not understood is potentially one of the most valuable treasures of all time. It contains computation algorithms and knowledge that have evolved over \*at least\* the last 4 billion years. Relative Quaternary Fractal (RQF) Computation Theory (first published May 20th 2014) should provide everything you need to know to decode this junk part of the DNA. So DNA is part of a highly complex natural computing system. How does it work? The theory behind this immensely powerful computation system is described in my book. More information is provided in my other publications and US patent at // Evolution is random right? Wrong again! RQF Computation Theory provides the answers why. At least Quantum physics and everything else in the universe is random right? Still wrong! same as above. Evolution, thought, consciousness and matter itself are all different manifestations of the same basic principles. Once you understand RQF Computation Theory you will understand why. This leads to the possibility that the universe is a cosmic hyper-net where \*everything\* is interconnected. I won t go into the details here, but once you understand my theory you may also understand how and why this is not only possible but in reality quite probable. The language of thought, cosmic hyper-nets, the universal language of life, DNA (the 98 that mainstream science calls junk ) and the cosmos itself, has finally been decoded. It follows the same rules as human languages. It...
