It is fantastic and great. It usually will not charge an excessive amount of. Once you begin to read the book, it is extremely difficult to leave it before concluding.

I think I should say at this point that the union as such is not concerned with the many major questions of policy which this Commission will consider, such as the national origins quota basis or the number of aliens which should annually come into the United States. It is not because as individuals we are not intensely interested in that subject, but the union feels that it can be most effective if it sticks to the last and devotes its Official attention to the questions which concern it; namely, that aliens as well as citizens receive not only that minimum due process protection which our Constitution requires but that they also receive in the protection of their status, their rights and privileges the fairest procedure which our democratic tradition demands and which our experience with administrative procedures can devise. It is for that reason that I would like to restrict my brief remarks to the administrative procedures and judicial review available under the present law and under the new act and which should be available under our system, both in respect to visas and immigration procedures.
